West Port Said Container Terminal receives the first ship with draft 15.5 m

After completion of deepening alongside the container quay to reach 15.5m draft & length up to 370m to turn in front of West Port Said container quay, on Friday, March 22nd. 2019 PSCT received M/V "MSC SINDY", affiliated to MSC. The vessel berthed alongside the terminal quay at 17:45Hrs and handled 1022 Box (Discharge / Loading).

This comes in the context of the company's comprehensive development for terminal quays ,handling equipment system and increase the terminal yards area by adding the new yard (172000 m²), thus increasing the competitiveness of the container terminal and dealing with the new generations of containers vessels.

PSCCHC renews certificates of quality, environment, safety and occupational health

Port Said Container & Cargo Handling Co. (West Port Said Terminal) complies with the instructions of safety and occupational health, The Company has recently renewed the certificates of international systems for quality, environment, occupational safety and health:

PSCCHC
35 Years of

PSCCHC adheres to quality instructions and safe operation environment that enjoys with basic conditions of occupational safety and health and their role in supporting the competitiveness of the container terminal by implementing the best international standards in its various operations.

West Port Said Container Terminal took delivery of new STS

On Sunday 11/2/2019, PSCCHC received giant gantry crane, manufactured by the Chinese company (ZPMC). PSCT (Port Said Container terminal) took delivery of (1) Ship-To-Shore "ZPMC" Super Post Panamax gantry crane 65 tons with 58.5 meter outreach and width 22 stacks of double full containers with an investment cost 8 million and 806 thousand Dollars. This step comes to face the strong competition between container terminals in the maritime transport market, by developing handling equipment system to increase PSCT competitiveness as well as dealing with new generations of containers vessels, especially after the comprehensive development plans which was carried out during the previous two years by increasing the depth of the quay berth to allow receiving vessels with 15.5m draft & length up to 370m to turn in front of West Port Said container quay & exit to the sea as well as increasing yard area to be 572000 square meters. WPSCT is moving ahead with development plans and achievements in order to raise the company's position in maritime market, hoping further progress and development for PSCCHC.

Delivery of new STS

"Know and Protect yourself" initiative Sponsored by PSCCHC

As part of the State's keenness to raise the awareness among workers and train them to protect their safety from work risks, the State launched "Know and Protect Yourself" initiative, which implemented in several governorates through Ministry of Manpower. The event "Know and Protect Yourself" was held in Port Said City sponsored by PSCCHC during the period from 28-29 January 2019 in presence of Dr. Mohamed Ayman Rabie, Ministry of Manpower First deputy. confirming the company's full awareness and keenness to prepare risk-free work environment through continuous training of company's employees and raising awareness of work risks. PSCCHC is committed to safety and health system, providing safety work environment with basic conditions of occupational safety and health. Ministry of Manpower deputy and the visitors took a tour in the container terminal to view its activities and the principles of occupational safety and health applied within the terminal.

"Know and protect yourself"
